- BOOTCAMP

INTEREST

- GAMING
- READING
- COOKING

SUMMARY

A bootcamp graduate equipped with coding language as my strength. And eager to learn deeper to improve my skill and ability to create a quality application if I will be hired by your good company for the rule. I am also passionate to adapt the trend technology stacks.

EXPERIENCE

2010-2019

- Tested and installed motherboards, processors and graphics cards on desktops and laptops for corporate staff.
- Assessed system hardware and software and suggested modifications to reduce lag time and improve overall speed.
- Set up and maintained user accounts and client access.

PROJECTS

- Mini-Project1 we created a Tattoo Website the technology we use is HTML, CSS, JavaScript for the project we showcase Online booking and appointment scheduling.
- Major-Project2 we created an API driven app using the technology ReactJS, React Bootstrap for the front-end Webpage design and Postman, MySQL fetching the data to the server.
- Capstone-Project we created a E-Commerce website using the technology ReactJS, React Bootstrap for the front-end Postman API for the development toolchain, MySQL, PHP MyAdmin and Laravel for the back-end.
